Cost exceeds the special care nursery services. For more information and to set up a payment plan please call 330.263.8336.
Level II Care - Special Care Nursery and Women's Pavilion

Wooster Community Hospital is collaborating with Akron Children's Hospital to bring a higher level of perinatal care to our community.

A Level II nursery is able to care for babies born up to 8 weeks premature (at or greater than 32 weeks gestation), who weigh at least 3 lbs, and who are physically immature, such as those who have breathing problems or are unable to feed orally. The level II nursery is staffed by Akron Children's physicians and nurses. If your baby requires a special care admission, a courtesy room is available near the nursery allowing for unlimited visitation.

Labor and delivery also functions at Level II which means care is provided to mom's who are 32 weeks gestation and above for such diagnosis as preterm labor, threatened preterm labor, diabetes, and hypertension.

The healthcare team works together to provide a level of care to mom's and babies who go into labor before full term but do not require care at a tertiary care center. The goal of both facilities is to keep you close to home and together as a family to promote family bonding. In the event you require care at a tertiary care center and desire to return to WCH for care, discuss the candidacy of reverse transfer with your care provider.
