Wooster Community Hospital Community Care Network
Medication Reconciliation Process

**Nurse** (at first visit):
1. Compares discharge medication list with meds normally taken by patient including OTC, herbs, vitamins, etc.
2. Performs medication review
   - Type of med/dose/frequency
   - Expiration date on med bottle
   - # days/doses to take med
   - Look alike/sound alike
   - Contraindication/Interactions
   - Med purpose

**Pharmacist** (at first team meeting):
Receives med list and reviews

**Safety Strategies**
- If look alike/sound alike, label/place in different area
- Medication/nutrient interaction teaching
- Review/clarify discharge med instructions.

Evaluate problem
Examples:
- Med not in home
- Incorrect dosage
- Meds expired
- Other meds taken in past
- Med not on discharge list

- Contact physician to clarify med issue
- Document physician order received

Problem?

No
