

## Medical Services

### KIDZ Medical Services Coronavirus (COVID-19 Virus) Precautions

Throughout the COVID-19 pandemic, KIDZ Medical Services continues to be committed to excellence in providing a wide range of pediatric and neonatal services in South Florida. Our community has endured many challenges in the past few months. We share your concern about the health and welfare of the community, especially that of our children.

We have sworn an oath to protect and are continuously monitoring the everchanging information from the Center of Disease Control and other reliable medical institutions and journals. Because of that we are constantly evaluating this information and adapting our services to provide your children with the best and safest medical care.

The following measures are some of the precautionary evidence based best care practices we have implemented to do our part to limit the spread of COVID-19:

- We offer **telemedicine virtual** visits with our office-based physicians. To schedule a visit, please use the **Request An Appointment** form or use the **Locations** tab on our website to find the closest KIDZ location to you.

**Find the closest KIDZ location to you!**

<https://www.kidzmedical.com/locations/>

- If your child has an office visit scheduled, we ask that you arrange a telemedicine virtual visit if you or your child have or have had a respiratory illness with fever of 99.6 degrees or higher, cough and difficulty breathing within the past 14 days or have been in contact with someone who has or has had any of these symptoms within the past 14 days.
- We have created guidelines for our health care providers to follow to treat and protect our patients, their families and the community.
- We have established a NICU and PICU Telemedicine Virtual Visit Follow-up Program. This program has been created to help our NICU babies and PICU children transition to a home environment and their primary health care providers.
